

# Bring explosive style to your game with the 3D Fantasy

**Grenade pack By Pegasus Studios!** This asset pack features **5 uniquely designed grenades**, perfect for a wide range of genres including fantasy RPGs, sci-fi shooters, mobile action games, hero-based arena brawlers, or even stylized battle royale environments. Whether you're crafting a gritty warzone or a magical battlefield, each grenade delivers a distinct identity—from arcane energy cores to robotic expressions and brutal spiked casings.

These high-quality, stylized models are fully **game-ready**, optimized with efficient poly counts (1028–2576), and textured with **PBR materials** in 1024x1024 and 2048x2048 resolutions. Each grenade is provided as an **FBX model**, complete with prefabs and a demo scene for easy integration into Unity (**version 6000.1.1f1, URP**).

Features:

-  5 Unique, hand-crafted grenade models
-  PBR textures (Albedo, Normal, Metallic)
-  .FBX format + ready-to-use Unity prefabs
-  Compatible with **Unity URP**
-  Demo scene included
-  Ideal for RPGs, shooters, mobile, and fantasy/sci-fi projects

Inject creativity and variety into your weapon arsenal with this stylized grenade collection—explosions have never looked this good.

## Technical Details:

**Number of textures:** 25

**Texture dimensions:** 1024 x 1024, 2048 x 2048

**Polygon count of [3D Fantasy Grenades]:** 10,284

**Minimum polygon count:** 1028

**Maximum polygon count:** 2576

**Number of meshes/prefabs:** 5

**Rigging:** No

**Animation count:** N/A

**Animation type list:** N/A

**UV mapping:** No

**LOD information (count, number of levels):** N/A

**Types of materials and texture maps (e.g., PBR):** PBR textures (Albedo, Normal, Metallic, Roughness)
